## Mesotherapy

### Facial Mesotherapy

For double chin  
For bags under the eyes,  
For ageing skin

### Products:

As we are dealing with a lipolytic action treatment, we use **METABOLITES**, generally in quite a small quantity, given that the area to be treated is quite small.

### Technique:

We use an insulin syringe (it is very easy to handle) and make small, very superficial papules over the area to be treated. We disinfect and check that there are no haematomas. It is normally a complementary treatment to other localised or anti-cellulitic treatments. Therefore, we make use of the same session to carry out the mesotherapy in both areas. Consequently, the treatment will be applied once a week.

### Homeopathic Mesotherapy for bags under the eyes

This is also a frequent problem, which in the majority of cases we can minimise, thus delaying or even avoiding surgical intervention. In the last analysis, we are dealing with small accumulations of fat, and as far as fat is concerned, we are in possession of a therapeutic arsenal

### Love handles

## N-Lite

N-Lite laser has been described as the most significant advance in acne treatment for decades

The SmartPulse™ laser light targets the bacteria that cause the infection and stimulates the natural mechanism repair of the skin. By destroying the bacteria present in the skin, the laser light can clear acne sometimes in as little as two sessions

N-Lite also has a collagen replenishment application, which helps repair the damage caused by acne infection and reduces acne scarring.

As a result N-Lite treatment has a long-lasting beneficial effect on the overall texture of the skin

N-Lite is suitable for all skin types and can treat a number of areas including face, neck, back and chest

You will only feel a mild tingling sensation as the laser light is absorbed in the skin

The treatment itself is simple and fast. It takes about 30 minutes for a full facial treatment. The treatment is generally administered as a series of three sessions. Some patients may require additional sessions

You would normally see results within two weeks, with continued improvement over the following three months

Acne clearance has been shown to last over nine months. Regular maintenance treatments may be required after that

Side effects are negligible so you should be able to resume your normal routine straight-away

After

## Allergy and Health Screening

### The Latest Health Screening Technology From the USA

Helps to treat the following:

- |                          |                        |                          |
|--------------------------|------------------------|--------------------------|
| <i>Arthritis</i>         | <i>Digestion</i>       | <i>Menopausal</i>        |
| <i>Prostate Cancer</i>   | <i>Parasites</i>       | <i>Migraines</i>         |
| <i>Skin Support</i>      | <i>Weight Problems</i> | <i>Viruses</i>           |
| <i>Children's Issues</i> | <i>Fatigue</i>         | <i>Muscular</i>          |
| <i>Thyroid/hormonal</i>  | <i>Infertility</i>     | <i>Food Intolerances</i> |

This is a method of Health screening using the latest non invasive electrical devices to measure a person's bio energetic levels. These will highlight problems such as the conditions listed above

**It is:**

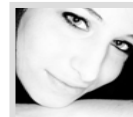

- Fast, non-invasive and painless
- There is no waiting for results - a computer printout is provided
- Test for intolerances to over 300 foods
- Establishes vitamin, amino acid and mineral status
- A personal treatment program is put together for you

Our therapist is a naturopath and uses a combination of nutrition, herbalism,

## Semi Permanent Make-up

- Eyebrows*
- Eye liner*
- Lip Liner*
- Beauty Spots*
- Areola Reconstruction*

## Mesotherapy - anti ageing facial treatments

### Non surgical facelift tailored to each individuals requirements

Using either Skin pricking injections or RF / Ultrasound

Ageing skin manifests itself by the appearance of facial lines, which include wrinkles, skin folds, skin atrophy and changes to the pigmentation (dyschromias). These symptoms are produced by the sum of the damage accumulated by age (intrinsic ageing), in addition to the damage inflicted by solar rays on the skin (photoageing), and the effect of gravity. The problems we can face in ageing skin as a result of solar radiation include mutations in the epidermal cells, the production of irregular pigmentation, wrinkles and facial lines, neo-vascularisation and skin atrophy. The damage to the dermis destroys the connective tissue which acts as a support to the skin. The intrinsic damage includes muscular action in facial expression and the loss of support tissue.

Consequently, in order to achieve a certain degree of skin rejuvenation we need to provide a treatment which effectively modifies the aforementioned factors, and therefore, one which acts on the different layers of skin. These are the epidermis, the dermis, the fatty layer and the muscular layers

## Endermologie

Endermologie® was the world's first patented technology to fight cellulite and is the cellulite treatment approved by the American Food and Drug Administration. It is a non-invasive treatment which was established over 14 years ago and is now used all over the world by clinics like ourselves as well as plastic & cosmetic surgeons. Endermologie® was originally used in the treatment of burns to prevent skin contraction and to loosen scar tissue. During its initial use it was noticed that it improved the appearance of cellulite and became widely aesthetic purposes

### What is cellulite?

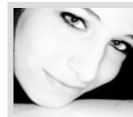

Cellulite is often described as the 'orange-pee'l effect most commonly found on the buttocks and thighs of up to 90% of the female population.

There are 4 types of cellulite:

1. *"Slight Cellulite"*: skin is smooth when you are standing, cellulite is only visible when the skin is pinched or contracted
2. *"Compact Cellulite"*: the cellulite is visible when you are standing but there is no pain
3. *"Loose Cellulite"*: the cellulite is present but is not visible when you are standing due to water retention in the dermis and hypodermis. The cellulite is visible when you contract the skin.
4. *"Painful Cellulite"*: any type of cellulite that is tender or painful during contraction of pinch test

During treatment you will wear your own specially designed body stocking. The therapist carries out the treatment with a hand held massaging head which delivers intermittent suction and rolling to the area being treated. Most patients describe the action as relaxing because the motion of the unit relates closely to that experienced with a deep body massage. The treatment is non-invasive and the rollers do all the work

Treatments normally last about 45 minutes

## Vasculite

### Vasculite

The combination of Intense Pulsed Light and pulsed laser light addresses both the dynamics of hydrostatic pressure and the complexity of vessel networks. This makes it more effective than conventional lasers or conventional injection therapy. Unique Multiple Synchronised Pulsing optimises treatment efficacy and the state-of-the-art cooling system increases patient safety and comfort

During treatment, light penetrates the skin and is absorbed by the blood. Delays between the pulses allow for sufficient cooling of the epidermis and thermal relaxation of the blood vessel

Immediately after treatment, the temperature within the treated blood vessel has been raised sufficiently for it to collapse and break down with virtually no purpura effect

After treatment and over time, the blood vessel disappears almost completely

# Colonic Irrigation – (COLON HYDROTHERAPY)

## Used to help treat the following:

- |                                 |                                    |                                 |
|---------------------------------|------------------------------------|---------------------------------|
| <i>Constipation, Diarrhoea</i>  | <i>Eczema</i>                      | <i>Back Pain</i>                |
| <i>Colitis</i>                  | <i>ME</i>                          | <i>Skin conditions</i>          |
| <i>Irritable Bowel Syndrome</i> | <i>Immunological Disorders</i>     | <i>Menstrual Problems</i>       |
| <i>Diverticulitis</i>           | <i>Joint Pain</i>                  | <i>Fluid Retention</i>          |
| <i>Atonic Colon</i>             | <i>Allergies</i>                   | <i>Unexplained Weight Gain</i>  |
| <i>Spastic Colon</i>            | <i>Abdominal Pain and Bloating</i> | <i>Poor Concentration</i>       |
| <i>Candida</i>                  | <i>Flatulence</i>                  | <i>Psychological Conditions</i> |
| <i>Parasite Infestations</i>    | <i>Haemorrhoids</i>                | <i>Insomnia</i>                 |
| <i>Halitosis</i>                | <i>Liver Congestion</i>            | <i>Detoxification</i>           |
| <i>Headaches</i>                | <i>Kidney Conditions</i>           |                                 |

Anyone with a history of consuming a 'Western' diet or one containing many refined or processed foods can benefit from colon cleansing and colonic hydrotherapy.

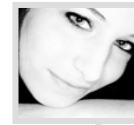

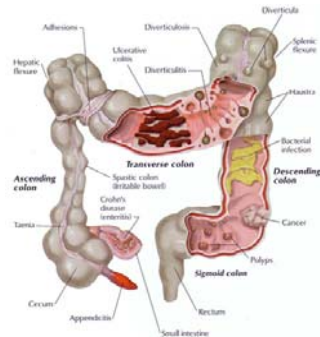

The importance of the direct relationship between colon health and general health cannot be over-emphasised.

A colonic treatment lasts between 45 and 60 minutes; new patients may take a little longer. We have both a male and a female therapist. Patient modesty is always preserved.

Filtered water is fed into the colon under extremely low pressure (far lower than is typically seen during normal defaecation) ensuring there is no discomfort and, importantly, no danger of bowel perforation. In combination with massage techniques, the water helps to soften and detach faecal matter and encrusted deposits, which are piped away with the water

The removal of bacteria from the colon also presents no problem as these propagate back to normal levels within a few days. In fact by removing old encrusted faecal material and mucoid plaque which are food sources for 'unfriendly' bacteria, colonics actually enhance the spread of friendly bacteria in the bowel

Colonics are not habit forming, unlike chemical or natural laxatives. Colonics do not lead to a 'lazy' catatonic bowel, but in fact help to improve bowel muscle tone and normalise its size and capacity

# PermaSculpt RF - using radio frequency

The permanent solution for body contouring, fat reduction, cellulite and wrinkle removal using radio frequency waves. Entirely non-intrusive external surface treatment

## Combined treatments

### Mesotherapy and Endermologie Combi

(NOT SUITABLE FOR THOSE WITH A PHOBIA OF NEEDLES)

Perfect for the permanent reduction of cellulite

This includes: 14 Endermologie sessions taken once or twice weekly and  
2 sessions of Mesotherapy

Endermologie is designed to break down cellulite and push the fat to the lymph nodes in order for the body to excrete it via the liver. However Endermologie has been approved by the FDA for "reducing the appearance of cellulite". In our experience if a maintenance plan is not followed at least once a month after the initial course cellulite normally reappears. Combining Endermologie with Mesotherapy allows us to disperse the fat that Endermologie cannot budge and thus make the treatment effective for longer. Your consultant will advise you what treatment is suitable for you.

### RF, Mesotherapy and Endermologie Intensive

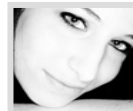

This treatment has only been available for 2 years and we have had no case of the return of cellulite in that period. However we do recommend a maintenance plan of a single session every 6 to 12 months.

This treatment comprises: 14 Endermologie treatments 2/week  
5 RF Sculpture treatments 1/week  
5 Ultralipo treatments 1/week

### Ultimate Non-Surgical Facelift

Results proven to be better and more natural looking than surgery!

Treatment time is 1 hour 15 minutes and comprises: DermaRenew  
RF Sculpture  
Mesotherapy  
RF Sculpture with Mesotherapy

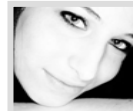

## PermaLift - micro current

Offers facial and body contour lifting by re-programming the muscle fibres, reducing and smoothing the fine lines and wrinkles on the face and neck. Sagging breasts and upper arms will improve immensely, along with skin tone and texture. The treatment is more than just a facial treatment. To enhance the treatment it can be combined with mesotherapy anti-ageing injections and face lift injections. By using the micro current probes the mesotherapy products can be induced into the skin to achieve the best results. Also known as 'Non-surgical facelift'

To achieve the best results, Permalift requires a course of 10-12 treatments, twice weekly. The Course should be repeated twice a year

**Treatment used for:** Face lift  
Breast lift  
Arm toning

## Cryosurgery - controlled freezing process

### For warts, skin tags and other skin lesions

Liquid nitrogen is applied to the lesion using a cotton applicator stick or an aerosol spray. Your consultant will touch the tip of the probe to the affected area. How long your consultant keeps the probe touching the skin depends on the size and type of the lesion. For some abnormal tissue, such as genital warts, the procedure works best if the tissue is frozen quickly, allowed to thaw for a few minutes, and then frozen again

For skin lesions such as warts, a small blister will form. The blister will later become a scab or a crust. We will advise you how to care for the wound. There are usually no complications from this procedure. However, some abnormal tissues may need to be treated more than once. We will tell you how often you should be checked for recurrence or retreatment. You will need a follow-up visit to check healing and to see if any abnormal tissue still remains

## The Obagi System

- for skin that Looks and Acts Younger and Healthier

**The Obagi Nu-Derm System:** As you age and your skin incurs the abuse of daily living (such as sun, stress, pollution), the cell renewal rate slows down. The new cells take longer to form and reach the top and the old cells accumulate and stay on the surface longer. You begin to notice those unwelcome signs of ageing, including fine lines and wrinkles, freckles and age spots, uneven skin tone, loss of elasticity and loss of natural skin hydration

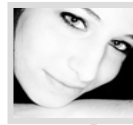

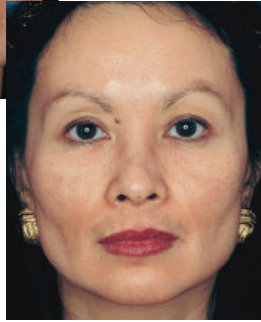

**How it works:** The Obagi Nu-Derm System, a physician-prescribed skin care system, accelerates the cellular turnover. This system penetrates deep to boost functions of the skin at the cellular level to help it look and act younger and healthier. The System triggers our Therapeutic Cascade™ of actions that: Pushes fresher cells to the surface faster, for smoother skin, reduced wrinkles and increased tolerance, reduces mottled pigmentation (freckles and age spots) and helps prevent the appearance of new pigmentation. Promotes more uniform cells at the deepest layer for better skin structure and balanced, more even skin tone, helps increase collagen and elastin for firmer, more resilient looking skin, increases nutrients, natural hydration and circulation for supple, healthy-looking skin. A healthy glow your friends will begin to notice on your skin. Your skin will look and act younger and healthier, and will be firmer and more resilient, have a more even colour tone and will be smooth and naturally hydrated

Using Blue Peel

Using Nu-Derm

## EpiSoft - Hair removal

We use the latest Intense Pulsed Light (IPL™) technology to perform hair removal on all areas of the body. EpiSoft (IPL) removes hair from all skin types and hair colours except white hair, which has no pigmentation to absorb the light

IPL treatments are safe, effective, virtually painless, approved by the FDA and offer clinically proven results. Even thick, dark hair responds well to treatment

EpiLight can remove hair from all parts of the body including chin, upper lip, cheeks, legs, arms, underarms and back, as well as sensitive areas like the ears, nose, chest and bikini line

Compared with traditional methods like electrolysis and waxing, EpiLight offers longer-lasting results and has relatively few side effects.

To complete a course of treatment can take over a year although results can be noticed long before this.

Please call for a complimentary consultation, including a patch test, with one of our friendly, professional and highly qualified therapists.

Female Chin

Having performed hair removal for the last 12 years, our results have shown we are the only clinic in the UK to show after completion of the course of treatments there has been no regrowth within this period

# BOTOX®

BOTOX is a focal muscle relaxing agent made from Botulimum toxin A

It is injection into the muscle at the problem areas. Down time is nil and you will stat to see results after a few days

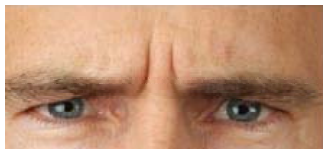

### Frown lines and wrinkles

Before

After

Before

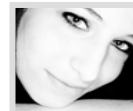

After

*I had excessive underarm sweating, but now I can wear silk...*

**Excessive underarm sweating:** BOTOX® is FDA approved for excessive underarm sweating that is not adequately managed with topical agents. BOTOX® neurotoxin treatment helps control this condition by temporarily blocking the chemical signals from the nerves that stimulate the sweat glands. When the sweat glands don't receive chemical signals, the excessive sweating stops.

All treatments performed by our resident medical practitioner including a two week follow up – with top up if required

# UltraSculpt (PAIN FREE)

- non invasive fat bursting lipo using ultrasound

## UltraSculpt (PAIN FREE)

- non invasive fat bursting lipo using ultrasound

Ultrasculpt is a revolutionary new treatment exclusively at Harley Aesthetic Clinic using ultrasound technology to implode fat cells. This treatment has all the results of liposuction without any of the side effects.

NO SURGERY, NON-INVASIVE, NO DOWNTIME and best of all PAIN-FREE – ‘Lunchtime Lipo’!

It is ideal for inch loss, extreme fatty areas and cellulite that just won't budge.

Note: For the optimum results the following homecare products are recommended :-

Adelplus (appetite suppressant)

Trumelin (lymphatic drainage)

**Want to know how it works and if it can work for you too – come in for a free no obligation consultation**

The photographs speak for themselves. At the time of printing no-one has completed a course of 10 treatments as this treatment is so new. Nevertheless the results have been astounding with most clients losing between 3 and 8 cms on their first treatment.

Remember these **are real photos from real clients**

1 year on after initial treatment

## DermaRenew - micro, milli or dermabrasion

### Treatment for:

- |                                |                                      |                         |
|--------------------------------|--------------------------------------|-------------------------|
| <i>Acne</i>                    | <i>Scar Tissue</i>                   | <i>Age Spots</i>        |
| <i>Acne Scarring</i>           | <i>Lymphatic Drainage</i>            | <i>Premature Ageing</i> |
| <i>Crows Feet</i>              | <i>Aged, Tired Skin</i>              | <i>In-growing Hair</i>  |
| <i>Fine Lines and Wrinkles</i> | <i>Open Pores &amp; Comedones</i>    | <i>Skin Blemishes</i>   |
| <i>Areas Of Pigmentation</i>   | <i>Stretch Marks Congested Skin</i>  |                         |
| <i>Sun Damaged Skin</i>        | <i>Uneven Skin Tone &amp; Colour</i> |                         |

If you suffer from any of these problems then one of DermaRenew's vacuum abrasion peel treatments can be adapted to suit your needs, leaving your skin with a smooth radiant glow. After just a few treatments any fine lines you have will have softened and any blemishes reduced. DermaRenew's vacuum abrasion peel™ treatment is very effective ensuring your pores are super-cleansed thereby refining your skin's texture and boosting production of fresh skin cells and collagen

The DermaRenew offers three different methods of dermabrasion with the addition of the vacuum lift treatment. Vacuum Crystal Peel - using very fine crystals to bombard the skin, gently removing unwanted layers of dead skin cells, leaving the skin fresh and radiant
